NARROW GAUGE & INDUSTRIAL RAILWAY MODELLING REVIEW

Each 56 page issue offers a wealth of interesting and much sought after material; generally 50% devoted to the UK scene and 50% to modelling. There are a minimum of two scale drawings per issue, sometimes more! Colour is used throughout to show layouts, models or the prototype to their best advantage. Over the years the magazine builds into an indispensible reference work on narrow gauge railways and how to model them.
